FOR IMMEDIATE RELEASE – November 10, 2008

HUSTON PATTERSON NAMES DIRECTOR OF ELECTRONIC PREPRESS

DECATUR, ILL. – Huston Patterson Corp., Decatur, Ill., recently named Kenny England as the Director of Electronic Prepress.

“I’m so excited and honored to have been selected for this position,” says England. “Huston Patterson has the most dedicated and talented employees and I want to build on that strength to take our prepress department to a higher level. Huston Patterson prides itself on exceptional service to each and every client and we are committed to them by decreasing turnaround time and increasing pinpoint accuracy and quality. ”

England has a long history with Huston Patterson dating back to 1985 when he began as a plate maker. Over a short period of time he advanced into the Striper classification and achieved Journeyman’s status in 1989. England left Huston Patterson for a short period of time in 2004 to further his knowledge in the electronic field in his positions with Esko and Oldham Graphics. England returned to Huston Patterson a year ago and most recently served as Director of 3rd Shift Operations.

“Kenny is a very valuable addition to the already talented prepress department,” says Victor Mullins, Director of Plant Operations. “With his leadership and our exceptional team, there should be nothing we cannot accomplish for our clients.”

As a world-class printing organization, Huston Patterson provides unparalleled value and performance through effective use of technology and craftsmanship by incorporating the unifying principles of trust, integrity and commitment. For more information, visit www.experiencetheevolution.com.
